KEOLABS
your challenges, our solutions

Contactless Level 1 Analog & Digital Testing Solution

KEOLABS proposes a fully automated solution for testing contactless cards and readers. It is the ultimate tool for analog and digital Level 1 testing.

● KEY FEATURES

- ☑ Contactless test for cards and readers
- ☑ Level 1 analog and digital
- ☑ Fully automated
- ☑ For characterization and certification

The solution is the most suitable for developers wishing to characterize or evaluate the conformity of their products. It is also intended for use in certification labs.

● KEY BENEFITS

Simple & Open Software

KEOLABS solutions can be used in two modes:

- Execution mode, the user runs automatically the test suite,
- Expert mode, the expert user can modify scripts and create his own test suite.

Powerful & Accurate Hardware

Based on hardware components coming from recognized independent experts.

KEOLABS
